Immunology is a branch of biomedical science concerned with the response of the organism to antigenic, biological, serological, and physical chemical effects of immune phenomena. While 'Cellular Immunology' studies the cells of the lymphoid organs, the clinical practice of Immunology encompassing clinical and laboratory activity, essential for diagnosis of diseases and healthcare management is called 'Clinical Immunology'. Hence Clinical and Cellular Immunology is a multidisciplinary approach to find solutions to the health disorders to the immune system.

Journal of Clinical & Cellular Immunology (JCCI) provides a platform to the researchers, experts and professional where peer-reviewed articles and cases on the discoveries and current developments in various fields of Immunology such as Clinical, Developmental, Diagnostic, Reproductive, and Evolutionary Immunology through open access mechanism.

This Science Journal publishes research articles, reviews, case studies, commentaries, short communications, and letters to the editor on various aspects of Cellular and Clinical Immunology making them freely available worldwide.

Journal of Clinical & Cellular Immunology - Open Access uses online manuscript submission, review and tracking systems for quality and quick review processing. Submit your manuscript at
