Journal of Food Processing & Technology

Open Access

Food Processing and Technology includes set of physical, chemical or microbiological methods and techniques used to transmute raw ingredients into food and its transformation into other forms in food processing industry. .

The journal includes peer-reviewed research covering all aspects of selection, preservation, processing, packing, nutritious and wholesome of food in application to food science. The Open Access journal encompasses the invasive exploration of the research in producing attractive, marketable, invulnerable, and often long shelf food products, according to the customer seldom by the researchers and food scientists.

Journal of Food Processing and Technology aims to provide a complete source of authentic information about the current developments in the field of food processing and technology. The contents of the journal are freely accessible through internet and promptly available to share the innovations of researchers and scholars for the progress of food science.

Journal of Food Processing & Technology - Open Access uses online manuscript submission, review and tracking systems for quality and quick review processing. Submit your manuscript at

<http://omicsgroup.org/editorialtracking/foodprocessing/SubmitManuscript.php>
