

International Conference on

OBESITY AND DIET IMBALANCE

November 29-30, 2018 Bali, Indonesia

Apoorv Shrivastava

Gokuldas Hospitals, India

Is laparoscopic bariatric surgery a gold standard option for morbid obesity: Our experience, the present and the future

Introduction: Laparoscopic bariatric surgery has become popular due to its effectivity and growing safety. More awareness regarding bariatric surgery is needed in developing world as it affects all classes of society.

Aims & Objectives: To evaluate our experience of bariatric surgery in changing patients quality of life with long term remission of comorbid conditions.

Materials & Methods: A retrospective analysis of 612 patients who underwent bariatric surgery at Apoorv Hi-Tech.

Results: Significant improvement in quality of life and remission of comorbid conditions.
