### Understanding parasites and cancer in the United States

This Power Point presentation is based on our work at Parasitology Center, Inc. (PCI), in Scottsdale, Arizona, USA and covers the diagnosis, pathology, relationships with cancer and treatment of human parasitic infections in the United States based on our own patient history and testing. The conceptual thesis and practical observations of extensive damage of parasites to human tissues and the initiation of host defense strategies causing out of control cell divisions leading to metastasis is emphasized. A brief introduction to laboratory procedures, misdiagnoses/mistreatment and impact on public health, especially cancer is made. A systematic treatment of protozoan and helminth (worm) parasites follows, emphasizing epidemiology and exposure, symptoms and gross pathology. Herbal and allopathic remedies including our own anti-parasitic herbal product freedom/cleanse/restore are presented. All topics are illustrated with labeled pictures of the various kinds of parasites and their gross pathology in human tissues, when applicable. The presentation is followed by a brief discussion of case histories and treatment of intestinal pathogenic bacteria that usually cause GI symptoms similar to those caused by intestinal parasites.
