## **Fever is not a symptom in covid-19 None of the diseases require fever as its symptom**

### **K. M. Yacob**

Marma Health Centre, India

We have been hearing for centuries that 'fever is not a disease but a symptom'. Physicians say that fever is a symptom of diseases like [flu](#) to [cancer](#).

The conservative fever definition, diagnosis, and treatments are based on fever as a symptom.

All the studies related to fever as a [symptom of a disease](#) have been done without knowing the Purpose of the temperature of fever is.

Without knowing the Purpose of the temperature of fever, how can fever included in the symptom definition?

Temperature between 38o to 41o centigrade can be symptom of a disease?

Most of the diseases may not have a fever. Sometimes it disappears. Then, is fever a symptom of which disease?

Symptom Definition is the only parameter necessary for a Symptom. As with any or all other definitions, symptom definition should describe the symptom scientifically. If it cannot describe clearly, there is no use of a symptom definition. A symptom is a departure from normal function or feeling which is noticed only by a patient, indicating the presence of disease or abnormality

Keywords. Symptom Definition, [Signals Definition](#), Symptoms of fever, symptoms of rising temperature.

### **Biography**

A practicing physician in the field of healthcare in the state of Kerala in India for the last 32 years and very much interested in basic research. My interest is spread across the fever, inflammation and back pain. I am a writer. I already printed and published nine books on these subjects. I wrote hundreds of articles in various magazines.

After scientific studies, we have developed 8000 affirmative cross checking questions. It can explain all queries related to fever
