Optometry is a health care profession that involves examining the eyes and applicable visual systems for defects or abnormalities as well as the medical diagnosis and management of eye disease. Being a regulated profession, an optometrist's scope of practice may differ depending on the location. Thus, disorders or diseases detected outside the treatment scope of apply unit of measurement referred resolute relevant medical professionals for genuine care, more commonly to ophthalmologists who are physicians that specialize in tertiary medical and surgical care of the eye. Optometrists generally work closely at the side of different eye care professionals like ophthalmologists and opticians to deliver quality and economical eye care to the final public.

Rome Euro Optometry 2020 is an event that aims to explore the ways to innovate in the field of Optometry, and to find new technique and improvement for better surgery at Rome, Italy on May 27-28, 2020.
