

Journal of Earth Science & Climatic Change

2020 Conference Announcement**Open Access**

9th World Conference on Climate Change scheduled on October 12-13, 2020 at Zurich Switzerland.

Mehdi Azadi*Postdoctoral Research Fellow, Department of Chemical Engineering, The University of Queensland, Australia, E-mail: mehdi.azadi@uq.edu.au*

Climate Change means the difference in the Earth's global climate or in regional climates over time. Climate Change is now a major global concern. Climate change melts the ice. It describes changes in the state of the atmosphere over time scales ranging from decades to millions of years. These changes can be caused by processes inside the Earth, forces from outside (e.g. variations in sunlight intensity) or, more recently, human activities. Ice ages are prominent examples. Climate change is any significant long-term change in the expected patterns of average weather of a region (or the whole Earth) over a significant period of time. Climate change is about abnormal variations to the climate, and the effects of these variations on other parts of the Earth. Examples include the melting of ice caps at the South Pole and North Pole. These changes may take tens, hundreds or perhaps millions of years.

The Climate Change 2020 is an event that aims to explore the ways to innovate in the field of Environmental Science, and to find new resources for better industrial development at Zurich Switzerland on October 12-13, 2020. The conference will serve as a platform to bring together leading chemists with different specialties such as environmental scientists, professors, Business delegates. Congress will discuss on the topics such as Climate Change and Climatology, Global Warming and Consequences, Causes and Effects of Climate Change, Earth Science and Climate Change Policies, Manifestation of Climatic Change, Climate Change & Biodiversity, Food Insecurity & Climate Change, Environmental Toxicology, Carbon Cycle, Climate Hazards, Risks of Climate Change, CO₂ Capture and Sequestration Climate Change Law & Policy.

Climate Change 2020 supported by the organizing committee network of renowned scientific and professional expert such as Dr. Mehdi Azadi, The University of Queensland, Australia, provided a platform for collaboration among colleagues, vendors, and

academia to reveal new innovations, solutions, ideas, and emerging technologies in Chemistry.

The 'Securities and Climate Change: State of the Market 2019 report is an inside and out examination of the atmosphere adjusted and named green security markets. The Report evaluates all bonds where continues are being utilized to fund low carbon and atmosphere flexible foundation. In this report, we reveal bonds that fund ventures perfect with a 2-degree change way as opposed to speculations that are imperceptibly naturally advantageous. This takes a sign from the Paris COP21 Agreement that speculations ought to be in accordance with the lofty discharge decrease direction expected to accomplish a quick progress to a sub-2-degree Celsius world. The 2017 report additionally has an emphasis on urban communities, with contextual investigations recognizing best practice and open doors for green city securities. Atmosphere back from open assets is anticipated to increment to US\$66.8 billion by 2020, with extra subsidizing anticipated that would originate from the private segment.

Environmental Conferences going to be held during January 2020 to December 2020 at various cities in Europe (London, Barcelona, Madrid, Valencia, Rome, Milan, Berlin, Frankfurt, Vienna, Zurich, Dublin, Edinburgh.... And Many More...!!!
