Editorial Note on Molecular Biology

Rai Saing*

Founder and Owner of the Cellular and Molecular Biology®

Editorial Note

Established by Professor Raymond J. Wegmann and with the article board comprised by a portion of the prominent researchers including Nobel laureates, the Cellular and Molecular Biology Journal is one of the premium and front-line International diaries in the field of cell science. The diary is the key main impetus and tracks the huge accomplishments and advances in cytology. Being transdisciplinary in nature, the diary offers a vastest conceivable inclusion of the related themes including cell cycle, apoptosis, cell flagging, quality articulation, organic chemistry and biotechnology. The diary centers around applied parts of cell science having natural, horticultural, ecological, biomedical and clinical significance and elevates novel examination to upgrade the current level of our comprehension of cell and life measures at sub-atomic level.

The field of atomic science considers macromolecules and the macromolecular components found in living things, like the sub-atomic nature of the quality and its systems of quality replication, change, and articulation. Given the key significance of these macromolecular components since the commencement of atomic science, a philosophical spotlight on the idea of a system creates the clearest image of sub-atomic science's set of experiences, ideas, and contextual analyses used by logicians of science.

The diary is delivering three issues each year with a normal of 4 to 5 articles for every issue. The general dismissal rate was about 60% with normal original copy pivot season of 35 days. The diary distributes articles on an open access stage under imaginative lodge attribution permit terms permitting reuse and reallocation. Notwithstanding advanced documenting of the distributed substance at the diary primary area, the articles are likewise filed at different filing and ordering information bases like Sherpa Romeo, Genamics JournalSeek, RefSeek, Hamdard University, EBSCO A-Z and Proquest Summons. The articles are likewise featured through different online advanced entrances as a piece of the diary's after creation computerized advancement strategy.

As of late the diary has redesigned its online composition accommodation framework to online diary the board framework that incorporates accommodation, article and survey following alternative for a very much organized and straightforward preparing by writers, commentators and editors. Late consideration of Google investigation gives the diary measurements and readership as far as perspectives and downloads. With these new extra highlights, the diary online perceivability and execution is required to increment many overlaps. I welcome the creators to impart their new examination results, survey and well-qualified sentiments and profit the advantages of optimized and proficient publication preparing alongside top-notch duplicate altering and graphical administrations offered by the diary.
