

About the Journal

Molecular Pharmaceutics & Organic Process Research journal is an open access journal that aims to publish most complete and reliable source of information in the mode of original articles, review articles, case reports, short communications, etc. and provide free access through online without any restrictions or any other subscriptions to researchers worldwide.

This journal creates a platform for the authors to make their contribution towards the journal. Journal of Molecular Pharmaceutics & Organic Process Research (JMPOPR) is a peer reviewed journal that includes a wide range of fields but not limited to Biochemistry, Physical and Pharmaceutical chemistry, Materials science, and Molecular and cell biology, Polymer and materials science, Drug carriers, Pharmaceutical-analysis, Molecular pharmaceutics, Molecular-imaging, Drug delivery, Molecular mobility, In silico modeling in drug development, Drug delivery systems and interfaces etc.

Molecular Pharmaceutics focuses on molecular mechanistic approaches to the development of bio-available drugs and delivery systems. Molecular Pharmaceutics concentrates on the combination of the chemical and biological sciences to proceed the development of new drugs and delivery systems. Molecular Pharmaceutics promotes high quality research advancing the understanding of pharmaceutics at molecular level.

About the Conference

The conference “21st International Pharmaceutical Conference and Expo” hosted by Conference Series was successfully completed which was held during May 10-11, 2020 with the theme “Novel technologies and future possibilities for the development of

Treatment and drug for COVID-19”. Benevolent response and active participation was received from the keynotes, speakers, chair persons and delegates

as well as attendees from the Scientists, Doctors, Professors, Pharma specialists, Pharmaceutical Industries, Healthcare Industries, Researchers and Students from the fields of Pharma, Health care divisions gathering at this ideal stage to meet, to share points of view and data through insightful keynote, whole, notice and B2B talks.

Speakers of this event:

Title: Synthesis, characterization and in vitro antimicrobial activity of carboxamides

Divyata Lava Saurashtra University, Rajkot India

Title: Development of chitosan coated calcium-alginate nanocapsules for oral delivery of liraglutide to diabetic patients

Fatemeh Shamekhi arbiat Modares University, Tehran, Iran

Title: Quantum Chemical Calculations of (2-Amino, 3-Amino, 4-Amino and 4-Hydrazino) Benzene Sulfonamides Compounds by DFT

DR.ANIL BATTI PROFESSOR & HEAD,
DEPARTMENT OF MEDICAL BIOCHEMISTRY

Why Special Issue

This special issue has been introduced to recognize those researchers who are with us from the starting of the Conference and kept their believe with us regarding the quality of the conference and the publication. Their continuous support make the Conference as well as the supporting journal to the conference successful and recognized by the international experts. Here in honor to those supporters, those speakers, those submitters, those researchers we are releasing the special issue with the abstracts accepted for the conference, full length articles submitted to the conference and with the short communication submitted to the conference.
