

How to raise the loud voice of common Indian women

Rahul Hajare,
Indian Council of Medical Research, India

Abstract

Why do we in our society refuse to talk about the same thing that caused us to be born? Most women appreciate it when their partners want to make sure their needs are met. The harder you work to please her, the greater the chance she will reciprocate. We have all heard that women 'fake it', but did you know how many? According Psychology Today website, only about 25% of women said they orgasm regularly during sex -- certainly not a number that inspires confidence in the sexual prowess of the average male. Evidently, it doesn't matter whether you're from the land of the Kama Sutra or the home of KY Jelly; the numbers suggest that if you're a man engaging in regular sex, you're probably not doing a good enough job. Fortunately, and contrary to what most of you are afraid of hearing, it isn't the size of the ship that matters, but the motion of the ocean. Even more simply put, how you're doing is all about what you're doing. So, in the spirit of literally helping out our fellow man, here are a few pointers on how to make sex more pleasurable for your partner.

Biography:

Dr. Rahul Hajare has been a hard worker all his academic life. After his Ph.D in Pharmacy from VMRF Salem which he completed with flying colours, he is fortunate to work NARI primer HIV research Institute to complete Post Doc under the of World Renowned Scientist Respected Dr. R.S.Paranjape., Retired Director & Scientist 'G' National AIDS Research Institute Pune.
