

## Market Analysis: Euro Surgery 2020

After the successful completion of the Surgery conference series, we are pleased to welcome you to the “15th International Conference on Surgery and Anesthesia.” The congress is scheduled to take place on August 10 - 11, 2020 in the beautiful city of London, UK. This 2020 Surgery Conference will give you exemplary experience and great insights in the field of research.

According to this research report, the global market for Surgery is projected to show a robust implementation of 6.5 per cent in the CAGR during 2019-2024.

Immunosuppressive drugs hold Hanging patient profile dynamics during organ transplantation has stimulated the implementation of transplantation diagnostics in the market. Furthermore, the hanging dynamics of patient profiling during Surgery have stimulated the implementation of transplantation diagnostics on the market. Transplant diagnostics products are expected to see significant implementation on the back of an increasing number of organ donors.

Organs that have been successfully transplanted include the heart, kidneys, brain, liver, lungs, pancreas, intestines, and thymus. Approximately 2,200 lung transplants have been performed worldwide every year since 2000 and beyond. Between 2000 and 2006, the median survival period for patients with lung Surgery was 5-and-a-half years, which means that half of the patients survived for a shorter period of time and half survived for a longer period of time.

In China, urinary organ transplantation is concerning \$70,000, liver \$160,000, and heart \$120,000. though these costs are still impossible for the poor, compared to the fees of the us, wherever a urinary organ transplant is also needed. Urinary organ transplantation is that the most ordinarily performed Surgery within the world. it's gained widespread quality by up the result of patients with end-stage excretory organ unwellness. With advances in urinary organ transplantation ways and improved transplant success, urinary organ transplantation is currently wide thought of to

be the most effective thanks to treat chronic nephrosis for several individuals.

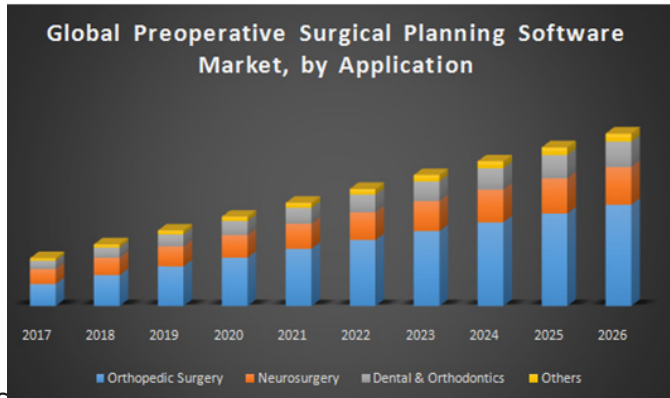

Kidney transplantation is the most commonly performed Surgery in the world. It has gained widespread popularity by improving the outcome of patients with end-stage renal disease. With advances in kidney transplantation methods and improved transplant success, kidney transplantation is now widely considered to be the best way to treat chronic kidney disease for many people.

In 2018, the global market for organ transplantation was 67 million US\$ and is expected to reach 86 million US\$ by the end of 2025, with a CAGR of 10 per cent between 2019 and 2025.

In recent years, the market for Surgery has seen significant implementation directly on the back of the increasing number of procedures for organ transplantation. In addition, an increase in the rate of organ donation and an increase in the prevalence of chronic diseases is expected.

Euro Surgery 2020 welcomes attendees, presenters, and exhibitors from all over the world to London, UK. We are delighted to invite you all to attend and register for the 15th International Conference on Surgery and Anesthesia (Euro Surgery-2020).

Special knowledge and skill in the design and surgery of grafts, flaps, free tissue transfer and replantation is necessary. Competence in the management of complex wounds, the use of implantable materials, and tumor surgery is required. Unlike other medical disciplines, surgery is not defined by an anatomic area (Ophthalmology, ENT, thoracic surgery) or organ system (gastroenterology, urology,) or patient age group (pediatrics, adolescent medicine, geriatrics). It deals with everything from head to toe. The spectrum of surgery is very wide.

Surgery is an essential medical specialty, which uses operative manual and instrumental techniques on a patient to investigate and/or treat a pathological condition such as disease or injury, to help improve bodily function or appearance or to repair unwanted ruptured areas. Total number of procedures performed in UAE every year is approximately 51.4 million and all over the world are approximately 234 million. With new modifications in techniques and drugs, Surgery Conference has become an important convention for doctors and technicians across the world to come together and learn about the advancements. The below picture showing the development of surgery in future.

According to the report, the global surgery care prod-

ucts and services market was valued at around US\$ 88,000 Mn and US\$ 520,000 Mn, respectively, in 2017 and is projected to expand at a CAGR of around 4.5% and 5.5%, respectively, from 2018 to 2026. Unhealthy lifestyle habits and rise in obese pediatric population propel the pediatric health care products and services market. The world is going through a rapid nutritional and epidemiological shift, rise in prevalence of obesity, cardiovascular disease, nutrition-related chronic diseases, and cancer. Changes in lifestyle, for instance, in eating habits, have led to an increase in obesity. Obesity is a growing problem in developed as well as in developing countries. Obese or overweight children are likely to remain obese in their adulthood and are susceptible to non-communicable diseases, such as cardiovascular diseases and diabetes, at a younger age. According to a study conducted by the World Health Organization (WHO), in 2016 the number of overweight children, under the age of five, was estimated at more than 41 million globally. Almost half of all overweight children under five years of age lived in Asia and one quarter lived in Africa.
