

Past Conference Report - World Neurology Congress 2020

Deanna Mastellone

Dementia Advocate, Neurology, Sydney University, Australia, **E-mail:** deannamm@bigpond.net.au

We're pleased to bring you exciting news about next year's [World Neurology Congress](#). We have set a date and location that we hope for the foundation of a productive and enjoyable gathering.

[Neurology Congress 2019](#) will be operated by world class experts in the field of Neurology and [Neuroscience](#), International symposiums, B2B meetings, and workshops will also be organised to discuss the specific topics in the field of Neurology like Clinical Neurophysiology, [Neurosurgery](#), Neuro Muscular Disorders, Neuro Infectious Diseases, [Pediatric Neurology](#), Neuropathology, [Brain Tumor and Neuro-oncology](#) and many more. The conference is aimed to identify the genetic determinants of common disorders to understand the mechanisms underlying human cognition. [Neurogenetic Disorders](#) are common among developed and developing countries. Genetic disorders and congenital abnormalities occur in around 2-5% of live births accounting for approximately 30% of pediatric hospital admissions in many places in the world. Neurogenetic conditions are generally chronic, long-term and incurable. In Netherlands approximately 10% of patients with neurological conditions have a single mutated gene as the basis for their disease. Furthermore, when polygenic inheritance is considered that is, the interplay between multiple genes and environment, a much larger proportion of neurological diseases are included. [Dementia](#) is strongly linked with age, and the Netherlands and other European countries have an increasingly ageing population. Currently 16% of the European population is over 65, with this figure expected to reach 25% by 2030. In the Netherlands it has been estimated that dementia alone costs the economy £17 billion a year.

Student Poster Competition is organized at Conference, to encourage students and recent

graduates to present their original research which will be later published in the Conference Series LLC Journals. All accepted abstracts will be presented at the poster sessions during the conference. Conference Series LLC provides an opportunity to present E-Poster for all the students who cannot attend the conference with abstract published in the website with DOI number Live Streaming is a value added service offering to speaker at Conference Series LLC Conference.

Perks:

- All accepted abstracts will be published in the respective journals.
- Special privileges on group registrations.
- Chance of b2b meetings
- Opportunity to organize workshop/symposia
- Best poster and young researcher awards
- Best Key Note Speaker awards
- Best Organising Committee Member awards
- Best Speaker awards

[Scientific Session:](#) Neurology |Neurosurgery| Brain Disorders |Central Nervous System | Neurogenetic and Neurometabolic Disorders |Neuropharmacology |Neuroscience| Spine and Spinal Disorders| Neurophysiology | Neurogenetic | Neurodegenerative diseases

The entire accepted abstract will be published with our supporting journal Expert Opinion on Environmental Biology. For manuscript publication with our supporting journal contact us further.

Located on the southeast coast of the Persian Gulf, Dubai is a global city and the business hub of the Middle East. It is also a major global transport hub for passengers and cargo. Oil revenue helped accelerate the development of the city, which was already a major mercantile hub. Today, less than 5% of the emirate's revenue comes from oil. A centre for regional and international trade since the early 20th century, Dubai's economy relies on revenues from trade, tourism, aviation, real estate, and financial services.

As assessed by WHO around 6.8 million individuals bite the dust each year because of neurological issue. Fuelling development in the worldwide market for neurology gadgets is the expanding case of cerebral stroke and other intense issue, in particular epilepsy, Alzheimer's ailment, and Parkinson. Around 50 million individuals in the U.S. are harrowed by such scatters coming about high costs acquired in treatment as indicated by Transparency Market Research finds that it would achieve an estimation of US\$13.6 billion of every 2019 by ascending at a great pace which was distributed with an on-going report for neurology promoting gadgets.

As indicated by another report by Grand View Research, Inc. the worldwide neuroscience advertises is anticipated to achieve USD 30.8 billion by 2020. Germany, U.K., France, Switzerland, Italy, and Spain are the main nations in Europe in the neurological issue drugs advertise. The event of neurological issue, for example, epilepsy, Parkinson's infection,

Alzheimer's malady, different sclerosis, schizophrenia, horrendous cerebrum damage, spinal line damage, cerebrovascular sicknesses has expanded the interest for neurological medications in the market. The European medication showcase is relied upon to achieve US\$32.0 billion before the finish of 2024 when contrasted with US\$18.3 billion out of 2015.
