

Renewable Energy and Resources Conference: 2020 Announcement

Christopher Niezrecki

Department of Mechanical Engineering, University of Massachusetts, Lowell, USA, E-mail: Christopher_Niezrecki@uml.edu

Conference Series LLC Ltd welcomes you to attend **the 3rd International Conference on Renewable Energy and Resources during May 28-29, 2020 at Vancouver, Canada.**

The relative novel nature of the conference is to bring the advancement within the field of utilization of natural resources. We heartily invite all the participants curious about sharing their data and analysis within the arena of renewable energy and environmental sciences.

Renewable Energy 2020 is that the integration of recent technologies within the field of ecology to assist Environmental Professionals harnesses the complete potential of their follow. It involves the employment of tools and technologies to realize an explicit degree of content and broaden the reach of the follow and therefore the practical. The conference could be a rare opportunity for all individuals of the environmental community to upgrade their power of the newest technologies.

Renewable Energy 2020 has been designed with a twin objective in mind. The main theme of the conference is "Exploring the Innovative Research at Interface of Renewable energy" that covers a wide range of critically energetic sessions.

The event aims at bringing the advancement in the field of Renewable Energy, Environmental Science, Geothermal Energy and Green Technologies and also lays a special emphasis at educating and informing environmental researchers, trade professionals with the newest information of technologies might be applied to counter the economic under-evaluation ecologist may face in their practice. Meet the eminent researchers working in the field of renewable energy and Technology. This conference will be the best platform to explore your research work and innovations in the respective areas. This conference is focused on all the major fields of Renewable Energy.

With members from round the world targeted on learning concerning Renewable Energy, this is your single best opportunity to reach the largest assemblage of participants from various communities, conduct demonstrations, distribute info, meet with current and potential speakers and receive recognition at this 2-day event. The hallmark of this conference is our worldrenowned speakers, the most recent techniques, latest

advancements updates in Renewable Energy field.

Renewable energy and resources is most important and valuable source. It's a part of consumer's broad plan to meet the energy needs of customers for the next 20 to 30 years. It's an environmental friendly and naturally replaced, it produces energy from organic and natural factors and they are wind, sun, water, plants. Energy guard has been an important concern to world leaders since the end of the 20th century. The global hydrogen energy storage market is projected to reach USD 18.2 billion by 2024 from an estimated USD 13.8 billion in 2019, at a CAGR of 5.8% during the forecast period. The growth is attributed to the increase in use of stored hydrogen for stationary and backup power application. In addition to this, the demand for hydrogen is also generated from the chemical industry where hydrogen is used in the processes of producing ammonia and methanol.

About Venue:

Vancouver is a coastal seaport city in western Canada, located in the Lower Mainland region of British Columbia. Vancouver is consistently named as one of the top five worldwide cities for liveability and quality of life. With its scenic views, mild climate, and friendly people, Vancouver is known around the world as both a popular tourist attraction and one of the best places to live. Vancouver is also one of the most ethnically and linguistically diverse cities in Canada with 52% of the population speaking a first language other than English. Vancouver has hosted many international conferences and events, including the 2010 Winter Olympics and 2010 Winter Paralympics. Vancouver is on the southwest corner of the province of British Columbia, surrounded on three sides by water. Vancouver is one of North America's most under-rated tourist destinations. It is a modern, travel-friendly city with a unique mix of cultures. The relatively mild Pacific Northwest climate and an energetic restaurant and nightlife scene are other features that make this such an attractive city. Majestic mountains, sparkling ocean, rainforests and beautiful foliage throughout all four seasons make Vancouver one of the most beautiful cities in the world. Canadians are known for our friendly nature.
