Journal of Traditional Medicine & Clinical Naturopathy covenants with Traditional and herbalist way of preventing or treating a disease. Additionally its wide as well as focused scope encompasses modern evidence based clinical research. In this wide world country specific regional specific remedies exist, some are very popular and effective and some are legend or faith based and steeped in traditional following.

Most of the traditional medicines are considered as Naturopathic remedies and each one follow different philosophy of curing a disease. Some believe in preventing a disease while some believe in curing a disease. Traditional medicine and Naturopathy may involve intuitive and subtle science of nature or nature derived products and physical or mental techniques and qualities. On wholesome these are the basis of alternative, traditional as well as holistic and integrative medicine.

Due to the journals wide scope and quality in Strict Double Blind Peer Review Process, the Journal is running successfully since 9 years with quarterly issues.

As we are getting several articles for publication we are following certain criteria in accepting them. Not all the articles submitted will get published. In the first step it will undergo Preliminary Quality Checkup, where the article is checked whether it is plagiarized or published anywhere else or suitable for the journal scope. Later the manuscripts are assigned to the Editors and Reviewers to undergo Peer Review Process. Here upon the choice of an author sometimes we undergo Rapid Peer Review Process also. According to the journal policy we undergo double blind policy where we will not reveal the authors and reviewers details to each other.

Journal of Traditional Medicine & Clinical Naturopathy is the Council Contributor Member of Council of Science Editors (CSE) and following the CSE slogan Education, Ethics, and Evidence for Editors. The "Journal of Traditional Medicine & Clinical Naturopathy" is using Editorial Manager System for online manuscript submission, review and tracking. Editorial board members of the journal or outside experts review manuscripts; at least two independent reviewers approval followed by the editor is required for the acceptance and publication of any citable manuscript.
