

## Valuable scientific discussions to contribute future technologies about Chemotherapy and Immunotherapy

Joseph W Raechel\*

Department of Orthopedics, University of Toledo, USA, E-mail: [raecheliwo@gmail.com](mailto:raecheliwo@gmail.com)

The consultants Meeting on **Chemotherapy -2020** is planned to be conducted within the month of Gregorian calendar month **October 28-29, 2020** at **Amsterdam, Netherlands**. This Conference is CME & CPD authorised. **Chemotherapy -2020** are going to be organized around the theme “Revolutions in Chemotherapy and Immunotherapy.”

**Chemotherapy-2020** includes prompt Keynote presentations, Oral presentations, Poster presentations and Exhibitions. The aim of **Chemotherapy-2020** is to globalize the interest, stimulate analysis, and promulgate information on all aspects of cancer medicine. This event can provide opportunity to get associated with leading oncologists, doctors, scientists, academicians, specialists & business associates from everywhere in the planet.

Worldwide cancer affects quite 10 million people annually and also the incidence of cancer is anticipated to extend by 2.4% annually to succeed in 14 million per annum by 2020. Cancer is that the second commonest death within the industrial world.

The Global Cancer therapeutics Market was valued at \$81,291 million in 2016 and is calculable to achieve at \$178,863 million by 2023, registering a CAGR of 11.9% from 2017 to 2023. Cancer therapeutics involves the employment and administration of medical chemistry, chemotherapy and oncology medicine to treat cancer.

Global Radiology Information Systems Market Size Through 2017 to 2024 (in USD Million)

CAGR: 7.65%

The global radiology information systems market is expected to reach \$722.1 million by 2019 from \$501.1 million in 2014, at a CAGR of 7.6% from 2014 to 2019.

Our Cancer Medicine, Radiology and Treatment conferences mainly focus on topics such as:

Cancer Cell Biology & Genetics, Cancer & Stem Cell Therapy, Cancer Causes And Risk Factors, Cancer Awareness and Survival, Surgical And Clinical Oncology, Oncology Nursing Care, Cancer Prevention & Research, Oncology Radiation, Nanotechnology.

The prominent characters at the gathering were

- Thomas W.kozlowski, Associate Director of Operations, Singapore
- Kunal sharma, Oncopathologist and Molecular Pathologist, SRL Diagnostics India
- Vinay sharma, teacher, University of Witwatersrand, South Africa
- Dr. Joshua ko, partner teacher, Hong Kong Baptist University ,Hong Kong
- Dr Daniel Gandia, Clinical Oncologist, National University of Buenos Aires, Argentina.
- Prissadee thanaphongdech, professor, khonkaen University, Thailand.
- Paulus S. Wang ,teacher. National Yang-Ming University, Taiwan.
