

Endeavoring the latest advancements in Neuroscience and Neurological Disorders

Jera Kruja

University of Medicine, Albania

Pulsus is privileged to announce its next series of the Neuroscience Conference **7th International Conference on Neuroscience and Neurological Disorders** in London, UK on **September 20-21, 2021** after the successful completion of its previous editions.

Neuroscience 2021 is glad to have all your presence in this 2 days event and we are eager to know about your research concepts which will be helpful for the gathering to gain their knowledge.

The theme centered for the Neuroscience 2021 is *Endeavoring the latest advancements in Neuroscience and Neurological Disorders* Neuroscience 2021 Conference has interesting scientific sessions for the participants to present their research work.

Neurological Disorders are the diseases of the brain, spine and nerves that connect them. There are ample evidence that neurological disorders are among the major public health threats. More than 600 nervous system conditions such as Alzheimer's disease, brain tumours, epilepsy, Parkinson's disease and stroke are present, as are less common conditions such as temporal dementia in the frontal area.

Brain disorders affect hundreds of millions of people worldwide. Over 6 million people lose their lives each year from stroke, more than 80% of which are killed in underdeveloped countries. Global seizures occur over 50 million people. There are believed to be 47.5 million dementia sufferers world-wide and 7.7 million new cases are identified annually-Alzheimer's disease is the most common cause of dementia, increasing between 60% and 70%. Migraine prevalence reportedly reaches 10 fold.

The annual conference of neurologists, neuroscientists and practitioners of the field of neuroscience, neurology and neurosurgery is a distinctive platform for the gathering of world-class scholars, brain researchers, public health professionals, scientists, academics, researchers from the industrial field, researchers and scientists, researchers of state of the art. The Conference will include a range of interesting academic events, including forums, seminars, lunches for affinity groups, presentations and research lectures by renowned neurologists and neurosurgeons from around the world.

The conference highlights include Neuroscience, Neurological Disorders, CNS, Neuroscience Equipment's, Neurophysiology, Neurochemistry, Neurogenetics, Neuropathology, Neuroimmunology, Neuropsychiatry, Neuroradiology and Imaging, Neurosurgery, Neuro-oncology, Neuropharmacology, Neuro Feedback, Nursing in neuroscience, Pediatric Neurology, Case studies and ethical issues, etc.

Neuroscience 2021 intends to unite all the neuroscience specialists under one roof to exchange their knowledge, the latest advancements in the field of Neuroscience and the therapies for the Neurological Disorders for the entire Neuroscience society.

Our Spain Neuroscience Conference will focus the Neurologists, Neurosurgeons, Neurophysiologist, Neuro and CNS drug Industries, Neurology Organizations & societies, Neuroscience associations & foundations, Pharmacists, Psychiatrist, Pharmaceutical companies, Neuro patients, Medical Students, Medical professionals, Nurses, Neuro palliative organizations, Bio medical-engineers, Researchers, Academic Scientist, Exhibitors, Healthcare consulting firms, Start-up Organizations, etc.

Neuroscience 2021 Conference is anticipating more than 150+ Participants to elucidate the theme of the Conference. Neuroscience 2021 coordinates Oral/Poster Presentations, Workshops, Symposiums, and Exhibitions.

With your support and high quality talks from both Neuroscience and Neurology groups, we will explore all options to render Neuroscience 2021 a success. We promise you that during the meeting you will enjoy world-class hospitality and facilities.

We look forward to the success of the Neuroscience 2021 Conference like our other series of Neuroscience Conferences!!

Join with us, Neuroscience 2021 is forthcoming!
