Dear Authors, Reviewers and Readers

It is with great pleasure that we celebrate the launch of Journal of Molecular Immunology (JMI) with this inaugural issue. I am so grateful to David G. and the staff at OMICS International Journals.

JMI is dedicated to the rapid dissemination of high quality research papers on how advances in molecular immunology can help us. We welcome contributions that can demonstrate molecular and cellular immune responses. We wish to assist in promoting and exposure of

high quality scientific achievements and intellectual input of scientists. We invite authors from all over the globe to contribute to this new journal.

I wish to encourage more contributions from the scientific community and industry practitioners to ensure a continued success of the journal. We also welcome comments and suggestions that could improve the quality of the journal.
